

The **Next Generation** Polycarbonate is here and customers deserve to be informed.

Thermoclear PLUS Twinwall, Triplewall, 6 Wall, Solar Control, & UV2

Lexan 8mm Thermoclear PLUS Twinwall

- Resists yellowing **5 times** longer than competitor's polycarbonate
- Carries a warranty against yellowing with no more than 2% light transmission loss over 10 years
- Produced by the European plant for over 24 years
- Maintains high clarity and mechanical properties

Lexan 8mm Thermoclear PLUS Triplewall

- 12% better insulation value than Twinwall
- UV protection on exterior side and dripguard feature on the interior side

Lexan 8mm Thermoclear PLUS Solar Control Twinwall

- One side solar reflective and one side UV protected
- Heat beneath sheet is reduced while light transmission remains high
- Solar control properties result in comfortable temperature levels inside
- Not available with anti-condensate feature

Lexan 8mm Thermoclear PLUS Twinwall UV2

- Both sides are UV protected
- Installation mistakes are minimized since both sheet surfaces may face outwards
- Protects the sheet against the degrading effects of UV radiation in natural sunlight

Lexan 25mm Thermoclear PLUS 6 wall UV2

- R Configuration
- 7% better insulation value over 5 Wall
