Innovators of Window Well Solutions

In August of this year, AmeriLux proudly announced the strategic acquisition of [Shape Products](#). The Wisconsin-based company is a leader in the thermoforming and compression molding industry with a focus on window wells and window well covers. Their extensive product offering provides numerous window well solutions that are affordable, durable, and aesthetically appealing.

Window Well Covers

Shape Products has been manufacturing high-quality window well covers for the last 20 years. The company has built a solid reputation for being honest, reliable, and dependable.

- The dome-shaped window well cover from Shape Products features a flexible design constructed from heavy-weight, UV-resistant polycarbonate plastic. Ideal for above-grade applications, this versatile cover can be used on any window well or brand that fits similar size specifications.

- Like their dome-shaped cover, Shape Products' universal fit window well cover is manufactured from a durable polycarbonate material that is virtually unbreakable. This easy to remove cover is designed for below-grade applications and may be used on a wide variety of window well shapes, sizes, and brands.

- Affordable and available in many different sizes, circular and elongated bubble window well covers from Shape Products are

made from a strong, medium-weight plastic. These molded, bubble-styled covers are designed for windows above grade and can be used on a multitude of common well sizes.

- Shape Products offers a wide selection of flat window well covers in a variety of shapes and sizes. These flat-topped covers are constructed from a tough and hard-wearing polycarbonate plastic with a clear UV formula, ensuring years of reliable use.

- In addition, made to order window well covers are an available option if a standard size does not work and will be custom built by Shape Products to address specific customer needs.

Shape Products window well covers provide excellent protection against rain, leaves, pests, and potential falls into a window well.

Window Wells

Combining state of the art equipment and skilled operators, Shape Products is able to provide innovative window well solutions that offer the best view from a basement living space.

- Designed to create visually appealing backdrops while letting in plenty of natural light, Shape Products egress window wells are known for their durability, realistic look, and simple installation. These one-piece, fiberglass window well systems offer multiple escape steps for a safe and easy emergency exit.

- Constructed from 50% recycled plastics, Shape Products plastic area window wells are durable and will keep out the dirt, gravel, and other debris. These molded window wells feature pre-drilled holes for easy installation and are stackable for combination heights.

Whether you are a homeowner installing a window well cover, or a contractor putting in an egress window well, the process will be quick and straightforward. These products are designed with simplicity in mind and are easy to install.

With such a broad range of capabilities, Shape Products is also able to offer custom thermoforming, compression molding, and fiberglass projects. The team can work with existing molds or help design a new concept from scratch. Whatever the needs may be, Shape Products can be a trusted resource for a custom project of any size.

Shape Products has grown its product offering over the past two decades to be the world's largest and most dependable selection of egress window wells and window well covers. The dedicated team at Shape Products takes immense pride in the quality and workmanship of its products. AmeriLux is excited to incorporate these products into its existing portfolio, bringing even more value to its customers, partners, and other stakeholders.

Featured Product

Agrilite™ Corrugated PVC Liner Panels

Impact resistant and rust-proof, Agrilite™ corrugated PVC liner panels are an economical alternative to metal in agricultural, industrial, and commercial applications.

The panels are lightweight and can be cut with basic woodworking tools for easy installation. They never require painting or refinishing and can be easily cleaned with conventional spray equipment.

Agrilite™ panels are a great choice for the most demanding applications.

- Ease of installation
- Low maintenance
- Remarkable durability
- Outstanding versatility

Agrilite™ is available in Greca and 9" profiles. Call 888.602.4441 or email us for help with your next project!

DIY Tip of the Month

Fall Clean Up

Although rain showers will deal with most of the dirt and dust that accumulates on polycarbonate sheets, leaves and other debris can pile up quickly on outdoor structures. Regular cleanings will improve their appearance, help maintain high light transmission, and prolong the life of the sheets.

Cleaning Tips:

- Use a mild dish detergent with a soft rag or sponge
- Never use aggressive cleaning agents or rough sponges
- Rinse sheets to remove any soap residue
- Dry with a soft cloth to prevent water spots
- Always test on a small area of the sheet first

Frequently Asked Polycarbonate Question

Q: Can you print on multiwall polycarbonate panels?

A. Yes! Multiwall polycarbonate is printable and a great material option for decorative barriers, partitions, and sliding doors. Multiwall panels are often used as a replacement for solid polycarbonate and acrylic due to their durable yet lightweight structure. These translucent panels can be printed on either the front or back surface, offering custom design solutions for residential and commercial spaces.

Daylight and the Circadian Rhythm

Did you know?

Increased daylighting in offices and classrooms has been found to improve cognitive function and increase productivity.

The impact of light on humans is natural and proven by science. Our bodies undergo physical, mental, and behavioral changes daily due to changes in light and darkness. This is called the circadian rhythm.

How Circadian Rhythm Works

Bringing natural light inside during the day triggers a response in part of the brain, called the SCN, creating positive output rhythms such as improved alertness, better mood, and greater energy.

Company Highlights

Meet the A-Team

Employee Spotlight | Shelly Koch

Looking for a new career challenge, Shelly joined the AmeriLux Logistics A-Team this past spring. With fourteen years of experience growing large corporate accounts for a big transportation and logistics company, Shelly brings a lot of valuable knowledge and experience to her role as an Account Manager and Broker.

"Building solid relationships with both my customers and carriers is the easiest way to describe my role," Shelly said. "I work daily with amazing customers and help them grow their logistics businesses. Plus, I get to build carrier relationships and help fill their equipment with freight."

Shelly is enjoying learning about and finding the best solutions for the accounts she's aligned with - both on the customer and carrier side. She's always looking to find that win-win!

"I love being part of something growing and making a daily impact with my team and customers."

Communication is Our Currency

At AmeriLux, we know communication is key. Directly, respectfully,

and thoughtfully working with one another and with our customers is essential to our success.

"We seek deeper, more profound connections that build authentic relationships. We look to create maximum value in our daily exchanges with one another through presence of mind and body."
