

Polycarbonate Protective Solutions

Multiwall Barriers Create Safe Environments

In our new world of social distancing, protective barriers have allowed businesses to reopen and people to resume their regular activities in a modified fashion. The installation of these physical barriers is playing a huge role in society's return to a 'new normal.'

Protective barriers create a physical barrier between individuals and are being used to slow the spread of COVID-19 in a wide range of businesses and public facilities such as grocery stores, restaurants, salons, hospitals, schools, banks, corporate offices, and government buildings.

Businesses around the world are rethinking their open common spaces, providing personal protection, and creating safe environments during this pandemic. Francesca's Cucina, an Italian restaurant located in Syracuse, New York, is a great example of how to creatively redesign an open floor plan to meet the needs of the COVID-19 times.

Even though the restaurant has an amazing garden patio for outdoor dining, changes were made both inside and out to satisfy COVID-19 restrictions and regulations. Outside, more space was put between the rustic tables and white fabric dividers were hung to provide separation. Inside, the seating capacity was reduced in the dining area and patrons can no longer linger while waiting for their reservations.

The dining room tables inside the restaurant have also been separated by dividers. The attractive arched partitions are built of rich dark wood and LEXAN™ VEROLITE™ 8mm opal polycarbonate panels. These translucent multiwall panels allow natural light to pass through the restaurant while the opal tint provides a sense of privacy for dining guests.

Click the video link below to see how Francesca's made the customer experience safe and still retained the restaurant's 'high energy' vibe.

With an array of temporary and permanent barrier solutions to choose from, LEXAN™ THERMOCLEAR™ multiwall polycarbonate sheet products offer many desirable physical properties for making protective partitions, separation walls, and screen barriers. Extruded from LEXAN™ resin, these high-performance multiwall polycarbonate sheets can be relied on to deliver low maintenance, protective glazing that is engineered to last.

During this COVID-19 pandemic, installing a layer of defense in public places is critical in reducing the spread of this infectious disease. Polycarbonate barriers are an effective way to keep us all safe and our economies open.

Featured Product

LEXAN™ Multiwall Polycarbonate Sheet

A well-established brand for over 40-years, LEXAN™ multiwall polycarbonate sheet is extruded from LEXAN™ resin, a high-quality thermoplastic with outstanding performance characteristics.

This versatile sheet provides an impressive balance of impact strength, thermal insulation, light structural weight, UV and flame resistance, along with a high degree of light transmittance.

Protective Barrier Product Advantages:

- Virtually Unbreakable, Lightweight Material
- Simple to Handle, Move & Install
- Cut On-Site with Common Tools
- Easy to Clean & Disinfect
- Meets Building Fire Code Requirements

LEXAN™ multiwall polycarbonate sheets are available in a wide range of colors, structures, coatings, dimensions, and gauges. Call 888.602.4441 or [email us](#) to help with your next project!

DIY Tip of the Month

Agrilite™ for Agricultural Buildings

Agrilite™ Corrugated PVC Liner Panels are a durable, economical alternative to metal in a variety of agricultural applications. Resistant to UV rays, Agrilite™ panels feature a high gloss white finish, creating bright, well-lit

spaces. The panels' smooth surface resists marking, withstands impact, and can be cleaned with conventional spray equipment.

- Hobby Farms
- Dairy Buildings
- Hog Barns
- Aquaculture
- Poultry Shelters
- Fertilizer Storage

Lightweight and easy to cut using basic woodworking tools, Agrilite™ PVC panels are simple to install. Why not upgrade your agricultural building with these cost-effective, low maintenance panels? Call 888.602.4441 for more product information and pricing.

Frequently Asked Polycarbonate Question

Q. How do I clean out the debris that has built up in the flutes of a multiwall polycarbonate sheet?

A. Remove dirt, dust, and other particles with a vacuum or blow out with compressed air. We do not recommend flushing the flutes with water.

Letting in Natural Light

Daylighting Solutions

What is a Daylighting Solution?

Daylighting solutions illuminate interiors of buildings with natural light and help to offset the energy costs of artificial lighting.

Durable, light weight, and featuring light diffusing properties, multiwall polycarbonate is a great material choice for a daylighting application.

Types of Daylighting Solutions

Sidelites

Skylights

Windows

Sunrooms

These daylighting solutions bring in comfortable, natural light in a variety of commercial, residential, industrial, and agricultural applications.

Company Highlights

Meet the A-Team

Employee Spotlight | Ben Kolka

After working for a year at a larger transportation services company, Ben longed for a structure that was less corporate. Impressed by its sense of community, he joined the AmeriLux Logistics team as a Business Development Leader this past February.

Each day brings something new to Ben's challenging and versatile role. "On any given day, I might be doing any combination of cold outreach to new potential customers, servicing existing accounts, making calls to carriers to understand market conditions, or spending time looking for new opportunities."

Ben says he enjoys working in transportation and connecting with people. "I get an inside look into businesses and regional economies all over the country." The greatest challenge he faces in his role is finding new ways to stand out from the crowd in the transportation industry.

"I've been able to connect with some great people who run very interesting businesses."

Win-Win

At AmeriLux, we believe seeking mutual benefit is the most productive and effective way to create strong relationships. We do not create "win-lose" scenarios and we don't accept

How We Succeed
At AmeriLux

"lose-win" situations.

"Every sustainable relationship, personal and professional, must be based on a win-win for all parties. We invest in creating wins for all stakeholders in AmeriLux: employees, investors, customers, vendors, and the community. We cultivate and nurture long-term, strategic partnerships with those who are like-minded, building mutually profitable business that results in the synergistic formula: '1+1=3!'"
